

"Nothing is too hard for the Shed Innovators"

Leaders in their field, Shed Innovations are the business to see for all your shed, garage, carport, commercial building, and verandah needs.

They also specialise in rumpus rooms, factories, barns and Class 1 type buildings such as river retreats.

Shed Innovations are a company that does everything from conception to completion.

This means all council documents are lodged for free, and they handle all site works, all concreting works, all the building and internal works, and all handovers; no site is too hard to get ready for your proposed project.

They can also do all the Stampcrete patterns in concreting, meaning more

works around the house at the same time to save the customer some money.

The commercial side of the business can extend current workshops or factories, do office fit outs, and convert building facades to give the building a modern look.

Shed Innovations ensure they put an emphasis on durability, quality and comfort, and all their materials and installs are fully guaranteed.

"We specialise in diversity of designs and engineering, including custom-made sheds for specific spaces and purposes, along with carports and verandas," Shed Innovations director Craig Wheeler said.

"By offering UltraFrame and C-Section structures, Shed Innovations gives its

clients the best options in pre-engineered building systems.

"We can provide a do-it-yourself kit or organise to have the shed fully installed on your property by one of our qualified builders.

"We can arrange everything from council application to earthworks, construction, concreting, plumbing and electrical works."

Shed Innovations have a wide range of concreting solutions; it doesn't just stop with your shed slab.

Have some extra paths done or have your driveway poured at the same time to reduce costs.

Have your entire block surveyed by Shed Innovations to show your contours for your project and future planning.

Shed Innovations always use forticon and chairs under their concrete to ensure no moisture enters your shed.

Shed Innovations installers are fully qualified erectors; they have completed training from the Shed Innovations building managers who show them the precise way the buildings are assembled.

The installers have a wide range of knowledge to get your building up in a timely and above satisfaction manner.

They are trained in framing, cladding, plumbing, roller door installation, window installation and much more.

Shed Innovations works hard to keep the price as low as possible and the quality as high as possible, and have the strongest and simplest design on the market.

For your next choice in a shed or garage choose Shed Innovations.

They are located at 331-333 Main South Road, Morphett Vale.
